**Centennial Park Splash and Youth Park Concepts**  
City of Fort St. John

The City of Fort St. John Youth Park and Splash Park took advantage of the City's most important community park, Centennial Park, to develop a project that unified and expanded park amenities and facilities especially for youth. Urban Systems provided design concepts, budgetary cost estimates, and grant applications to initiate the first phases of detailed design and construction.

The Fort St. John Park project is a legacy for the community to mark the millennium. The project celebrates the new era by recognizing the importance of young people as the foundation of the social, economic, and cultural characteristics of the community. The project will continue to look to the future by promoting the identity, connection, and participation of the next generation of community builders, the youth of Fort St. John, to their community.
