Victoria Harbour Plan

City of Victoria

Victoria Harbour is part of the larger Victoria/Esquimalt Harbour area. Victoria/Esquimalt harbour has been an important focal point for many centuries for the City and lower Vancouver Island. It is one of the most important safe harbours in the region, and is an important regional asset/facility with corresponding interface with other jurisdictions.

Victoria Harbour Plan is one of the City of Victoria's Neighbourhood and Precinct Plans as identified in the Victoria Official Community Plan (OCP). Together, the OCP and Harbour Plan provide instruction for the on-going use and development of the harbour. It provides a detailed analysis and series of recommendations which address specific sites in and around the harbour.
