THE CHANCE TO LIVE THE FORT ST. JOHN LIFESTYLE

Urban Systems is a Western Canadian consulting firm providing services to local and provincial governments, First Nations and the land development sector. Urban Systems is a 250 person strong, employee owned firm providing services from six regional offices throughout British Columbia and Alberta for over 30 years.

To meet the differing and emerging needs of our diverse client base Urban Systems has developed an integrated service offering that includes solid professional competencies in the disciplines of Engineering, Planning, and Landscape Architecture.

OUR FORT ST. JOHN BRANCH IS LOOKING FOR YOU

Over the last several years, our office in Fort St. John has grown into a dynamic and active office. The growth in the area has provided our office with a demanding work schedule that is long term and full of excellent opportunity.

The Fort St. John office is comprised of 16 full time staff. At the average age of 30, these professionals believe that fun, flexibility and success should all come together to provide a rewarding career.

At the heart of the branch is the belief that people should be given as much freedom and responsibility as they demonstrate they are able to handle. The result is an informal, fast paced and supportive branch that all share in being part of a successful team.

Fort St. John combines the best of urban amenities with the natural environment. Hunting, fishing, camping, sporting facilities and a strong local arts community provide a wide variety of activities and attractions. The construction of the Enerplex, which will be completed in 2008, will include an indoor speed skating oval, an NHL size hockey rink, and an indoor track.

Fort St. John combines the best of urban amenities with the natural environment. Hunting, fishing, camping, sporting facilities and a strong local arts community provide a wide variety of activities and attractions. The construction of the Enerplex, which will be completed in 2008, will include an indoor speed skating oval, an NHL size hockey rink, and an indoor track.

OUR FORT ST. JOHN BRANCH IS LOOKING TO ROUND OUT OUR TEAM WITH A CIVIL ENGINEER WITH WATER AND WASTEWATER INTERESTS.

Our ideal candidates will have the educational engineering or employment background and the desire to work as a consultant with all levels of government and land developers. We look for people with exceptional communication skills who can work independently and collaborate effectively on diverse, multi-disciplinary teams.

If this describes your background, we encourage you to consider the following questions to determine whether there is a match with your skills, strengths and interests:

- Are you someone with strong technical skills with a track record of leading teams in accomplishing objectives?
- Do you have the ability to convert your ideas into affordable, practical and relevant solutions?
- Do you have the ability to build strong and lasting relationships with co-workers and clients?
- Do you have a demonstrated commitment to delivering high quality and innovative work?

We believe strongly in employee involvement and development and provide opportunities for people to create their own career path. We are continually learning, advancing and expanding to meet the unique and changing needs of our clients and our people.

Our supportive culture incorporates formal coaching, mentoring and peer networks. We are strategic and intentional when it comes to providing our people with professional development opportunities that are challenging, rewarding and enable them to excel in a variety of areas. Professional Development Plans, allow for career growth and opportunities that are meaningful. Our University of Urban offers 12 to 15 courses a year on various topics such as "Becoming a Consultant, Excellence in Land Development and Effective Business Writing". All employees have the opportunity to network and gain the expertise needed to excel in their careers.

In addition, Urban Systems recognizes the importance of establishing support for our communities. In April of 1996, Urban Systems founding partner, Terry McQuillan, advanced a proposal for the creation of the Urban Systems Foundation. The primary intent was to do some good for our fellow human beings, and at the same time, give more focus to our charitable giving.

YOUR FUTURE DESERVES THE ATTENTION
