UNIQUE
CAREERS.**

Civil Engineering Technologist Fort St. John, BC

Recognized as one of Canada's top employers, Urban Systems is a civil engineering, planning and landscape architecture consulting firm based in Western Canada. We provide exceptional service to local and provincial governments, First Nations and the land development sector. We also provide exceptional career opportunities for our 300 employees located in seven offices throughout British Columbia and Alberta.

At Urban Systems, people matter most. We make significant investments in our people, which is why we take great care to hire only those who we believe will thrive in Urban Systems over the long term. We've become recognized as a workplace of choice by nurturing a unique corporate culture that sets us apart from the rest and provides:

- Challenging and interesting work
- Stable, employee-owned company
- A positive, flexible and supportive work atmosphere
- Collaborative, team based approach
- Ongoing career growth and development
- Meaningful rewards and recognition

About the Opportunity

Over the last several years, our office in Fort St. John has grown into a dynamic and active office. The growth in the area has provided our office with a demanding work schedule that is long term and full of excellent opportunity. The Fort St. John office is comprised of 16 full time staff. At the average age of 30, these professionals believe that fun, flexibility and success should all come together to provide a rewarding career.

Continuing demand for the kinds of services that we provide has prompted our search for another talented and motivated practitioner to join our team in Fort St. John. More specifically, we are looking for a capable and experienced **Civil Engineering Technologist** to round out our team. The opportunity will involve varied and extensive project work in all of our practice networks, working alongside seasoned veterans and recent graduates alike.

About You

Our preferred candidate will be a graduate of a Civil Engineering Technology program, with **three to five years** of general experience in municipal infrastructure design, land development and/or transportation type projects. In particular, we are looking for the following skills, strengths and interests:

- Skilled in Infrastructure Design from concept to detail.
- High proficiency in AutoCAD and civil design software including Civil 3D (required) and CAiCE (bonus but not required).
- Proficiency with Microsoft Excel and other Office Software products.
- Excellent communication and writing abilities.
- Excellent drafting skills with good knowledge of drawing set-up and production.
- Ability to produce high quality work under changing circumstances.
- An open mind to design options and a keen eye for detail.
- Ability to work independently and collaborate effectively with others.
- Committed to ongoing personal and professional development.

If this is something that you think you could get excited about, please visit our website for more information and send your resume and covering letter along with a completed Candidate Questionnaire (available for download on our website under "Join Our Team") to careers@urban-systems.com.
