Municipal/Water Practitioner Kelowna, BC

Recognized as one of Canada's top employers, Urban Systems is a civil engineering, planning and landscape architecture consulting firm based in Western Canada. We provide exceptional service to local and provincial governments, First Nations and the land development sector. We also provide exceptional career opportunities for our 300 employees located in seven offices throughout British Columbia and Alberta.

At Urban Systems, people matter most. We make significant investments in our people, which is why we take great care to hire only those who we believe will thrive in Urban Systems over the long term. We've become recognized as a workplace of choice by nurturing a unique corporate culture that sets us apart from the rest and provides:

- Challenging and interesting work
- Stable, employee-owned company
- A positive, flexible and supportive work atmosphere
- Collaborative, team based approach
- Ongoing career growth and development
- Meaningful rewards and recognition

About the Opportunity/You

The Kelowna branch is looking to add a municipal design engineer with 5 to 15 years of experience to complement our community and water practices. The individual should possess all the table stake attributes of an intermediate engineer, but must also clearly exhibit strong leadership qualities and technical prominence in all aspects of the water cycle. The individual will demonstrate significant knowledge of and experience within the local government sector and should be eager to leverage these past experiences into more evolved service offerings. He or she will integrate with our multi-disciplinary team of professionals throughout all phases of the project life-cycle (concept, plan, design, build, operate).

Our Preferred Candidate will possess the following skills, strengths and interests:

- Substantive knowledge in municipal design; including water, wastewater, and stormwater facilities
- Excellent technical and interpersonal skills with an aptitude for leading teams
- Appreciation for the dynamics of the engineering profession and the consulting marketplace
- Interest in exploring emerging technologies and market trends
- An aptitude for problem solving – seeing the big picture
- Flexibility with various project roles and responsibilities
- Thrives in a collaborative, open office working environment
- Ongoing desire to utilize existing skills in various applications including asset management or systems optimization

If this career opportunity is something you could get excited about, please visit our website for more information. Send your resume and covering letter, along with a completed Candidate Questionnaire (available for download on our website under "Join Our Team") to careers@urban-systems.com
